10th Standard
AVB Public School   New Delhi
CBSE Percentage: 92.72%   Jul 2019

ONGOING LEARNING

Machine Learning, Data Structures and Algorithms in Java

PROJECTS

- FemCare: Promoting Women's Health Through Technology
  FemCare is a tech-driven platform designed to educate women—especially in rural areas—and teenage girls about menstrual health and body positivity. It provides essential information on the menstrual cycle and features a health-focused chatbot for support. Built using HTML, CSS, JavaScript, and Python, it serves as a UI/UX prototype to promote wellness and awareness through an accessible digital interface. Future scope-integrating the features of e-commerce website.

- Stree Code: A Community for Women's Empowerment (ongoing)
  Stree Code is a dedicated community platform focused on the growth and development of women, with special attention to middle-aged women. It aims to bring women together, offering them a space to learn, connect, and rediscover their purpose in life. Through awareness programs, skill-building sessions, and access to various support services, Stree Code encourages women to actively contribute to community development initiatives—or even take the lead in organizing them. It's a movement toward empowerment, purpose, and collective progress.

- Zomato Data Analysis: Worked on Data Analytics. Analyzed customer order patterns, votes for each restaurant type, average spending by couples ordering online, and determined that online orders received higher ratings than offline.Tools used include Python, Pandas, Seaborn, Matplotlib, SQL.
